

ELECTRICAL ENGINEER

- Northern suburbs location
- Temp to Perm opportunity
- Excellent working conditions – immediate start.

EDAG Australia is a leading Engineering and Design organisation. We provide innovative engineering and resource solutions to the automotive, aerospace, defence, construction and manufacturing industries.

We take pride in our ability to provide innovative engineering and resourcing solutions for real world applications. Core to our business is the provision of technical and specialist recruitment services through our Recruitment Agency.

Our client is a well renowned Australian engineering company. They provide innovative design and manufacturing of high quality special purpose machinery and sub-contract precision machining.

An in-house opportunity has arisen for a qualified Electrical Engineer with at least 5 years experience in the design, delivery and commissioning of Automation systems. Experience designing systems for special purpose equipment, continuous manufacturing processes, and working within a quality assured environment will be highly regarded.

As the successful candidate you will report directly to the Manager of the Electrical Department and will have demonstrated experience using Siemens S7300 PLC's and WinCC SCADA.

If you have excellent communication skills, are able to work autonomously and liaise with individuals from all facets of the business, as well as key customers and stakeholders, we welcome your application.

This role would ideally suit an individual who has a keen eye for detail and has worked in a similar environment dealing with high precision and special purpose machinery. Remuneration will be in the order of \$80-90K plus superannuation – dependant on the incumbent's experience.

To submit your application, in confidence, please follow the link below. Alternatively, email your resume to recruitment@edag.com.au quoting reference number: #291. For a confidential discussion about this position please phone (03) 9676 8800
